

## Junior and Middle School Interface

# Softlink

## Hear it from Orbit users...

The students love using Orbit! It is easy, age-appropriate, has bright graphics and clear icons and can be used on Macbooks and iPads well. Very young students are loving using their iPads to search for their books using Orbit.

Our students find the Orbit interface engaging and easy to use. Students are using it from Kindergarten to Year 6.

Oliver and Orbit are helping us to engage students in the library. Children as young as the Year 1's are walking in, with no words, picking up an iPad, opening Orbit and going and finding a book on their own ... that's priceless.

Last week I observed my Year 2 students searching for a book using Orbit, looking at the photo map and then being overjoyed to find the book on the stack. Very satisfying!

Orbit is excellent for younger students and makes it easier for them to locate the resources they want. The ability to search by format eg. eBooks is a great idea.
